

The UK's premier flooring solutions company

ecotile

Environmentally Friendly Flooring for **Schools**

The world's No.1
interlocking floor tile

ecotile

Key Benefits

Introduction

The Versatile Flooring Company is the UK's premier school flooring solutions company and we have established an unrivalled reputation for product quality, flooring expertise and uncompromising customer service. A world leader in the manufacture, supply and installation of EcoTile loose laid interlocking floor tiles, we have invested heavily in the design and development of EcoTile to create a range of tough, low maintenance, environmentally friendly and extremely durable flooring that is ideal for schools, colleges and universities.

Manufacture, Installation & Responsible Environmental Practise

Many flooring products such as adhesive, primer, levelling compound and underlay can pollute the indoor air with volatile organic compounds (emissions) and odours. The internationally recognized EMICODE EC1 recommends that only very low emission products should be used within a school environment. EcoTile can be installed straight over the existing substrate without the need for screed, adhesive or underlay and the tiles surpass even the strictest regulations and guidelines helping protect both the environment and the buildings' occupants.

EcoTile is injection-moulded using either virgin or recycled plastics sourced from regulated recycling facilities. The tiles have excellent wear characteristics and long-term stability and are exceptionally hardwearing and suitable for almost any educational application. EcoTile has an anticipated life span well in excess of 20 years. EcoTile can quickly and easily be lifted for replacement or maintenance and when the floor has reached the end of its practical life we operate a free collection and recycling scheme to ensure minimum impact on our environment.

- *Exceptional durability*
- *Quick and simple to install*
- *Versatile and flexible*
- *Environmentally friendly*
- *Very low through life cost*
- *The world's No.1 interlocking floor tile*

The ecotile advantage

The world's No. 1 interlocking floor tile

Simple Installation

Minimal disruption to site, just overlap and tap ... no adhesive required.

Smart Modern Appearance

Precision engineered interlocking joint and a variety of colours and surface textures

Flexible

Place directly over existing and uneven floors... hides cracks, damage & stains

Easy to Maintain

Simple to keep clean and maintain

Exceptionally Tough

Superior durability for high traffic areas

Safe

Excellent slip-resistance, low risk of slipping even when wet (R10)

Warm & Quiet

Insulates the subfloor from cold and damp and significantly reduces noise

Fire Retardant

Tested to EN ISO 13501-1
Class Bfl s1 & BS 476: Part 7 Class 2

Cost Effective

No adhesive or screed equals lower installation cost

Better Performance

Longer lasting and easier to maintain than vinyl, rubber or carpet

Lower Life Cycle Cost

Does not require expensive repair and replacement

Easy to Move and Re-Use

Ideal for temporary applications or where access is required to the subfloor

Environmentally Friendly

100% recyclable & zero VOC emissions

Versatile

Wide range of colours, line markings and safety symbols

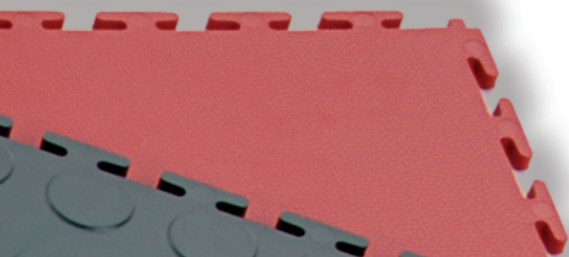

Floor Protection

Use as a temporary floor to protect expensive sprung wooden floors during exams or events.

Typical Applications

- Classrooms
- Science Labs
- Design & Technology Workshops
- IT Classrooms
- Home Economics
- Gyms & Weight Training Rooms
- Assembly & Sports Halls
- Changing Rooms
- Refectories & Canteens
- Temporary Protective Flooring
- Hallways & Corridors
