

Our wet area floor tile is manufactured by Bergo Flooring in Sweden, Ecotile are the exclusive UK distributor of this tile and provide a supply and fit service.

The Challenge

Swimming pools, changing rooms and other wet areas are notoriously hard to maintain; especially when it comes to flooring. Safety, durability and appearance should be at the forefront of the decision making process. Owners and operators of leisure facilities should consider the following:

- **Durability** – How long can the floor last under constant use?
- **Drainage** – Can the floor drain water away safely?
- **Chemical Resistant** – Will Chlorine damage the floor?
- **Environment** – Is the floor outdoors and will this effect fading?
- **Safety** – Fire retardant, slip resistant and anti-fatigue properties.
- **Maintenance** – How often do you need to clean the floor?
- **Aesthetics** – Will the floor look smart and modern?
- **Surface** – How hard is the surface under foot?
- **Repairs** – How easy is it to replace or repair an area of the floor?

Ecotile can be installed quickly over any hard surface **without disruption** and requires minimal maintenance. Simply tap the tiles together to create a safe and functional floor.

The Solution

Ecotile supply self-draining floor tiles (in a wide range of colours) designed for use in wet areas such as swimming pools and changing rooms. Ecotile can help you create a seamless, low maintenance floor surface that will never fade, crack, stain or wear out over time.

Safety is paramount and Ecotile provides the necessary anti-slip properties for around the pool, sauna or changing room.
