

Ecotile can fit and supply the perfect flooring solution for any type of exhibition or event. We've helped some of the world's largest brands launch, celebrate and promote their products through carefully delivered events.

### The Challenge

Brands both big and small use Ecotile because they require a durable, safe and smart looking floor that will draw attention from the crowd during events.

Every event is different; some are outdoors, some involve moving vehicles and some require bright coloured walkways. During the event planning stage there are several factors that organisers need to consider when choosing a floor including:

- **Durability and Time** – How long does the floor need to stay down for? How quickly can it be installed?
- **Environment** – Is the event indoors or outdoors? What about rain or harsh sunlight?
- **Safety** – Fire retardance, slip hazards and walkways.
- **Budget** – Can you deliver a functional floor for your budget?
- **Application** – How heavy is footfall? Are there any vehicles?
- **Aesthetics** – Can you incorporate logos and graphics into the floor?

Ecotile can be installed extremely quickly over any hard surface without the need for specialist tools, preparation or technical knowledge. Simply tap the tiles together to create a safe, functional and smart floor.

### The Solution

Ecotile can provide a solution to the majority of flooring concerns that event organisers face with product ranges suitable for both internal and external applications. Our interlocking tile range is capable of withstanding anything from **heavy footfall** all the way through to **extremely heavy loads** (HGV's and tracked vehicles). Choose from a wide variety of colours, create walkways and incorporate **company logos** into the floor so that your core brand message is always at the forefront of the event.
